

TECHNOLOGY FOR STUDENTS IN 2020 | 2021

Starting in Fall 2020, students will be required to have a computer and a reliable internet connection, which in many cases can be covered by financial aid. The computer requirement is to help ensure access to online courses via Brightspace, software and other electronic course materials, as well as access to online and virtual academic student support including tutoring, research assistance and the online success coach, which all contribute to student success.

Courses cannot be successfully completed with only a phone or tablet. YCCC will provide students free access

to Microsoft Office 365. YCCC utilizes a Microsoft Windows Environment for most of its classes, when buying a computer, it may be beneficial to purchase a Windows laptop or desktop.

Computer Suggestion for Most Majors*:

i3 - i5 Computer
4-8 GB of RAM
Standard Video Card
256GB-1TB of Hard Drive Space
Backup Solution (Portable Hard Drive or USB Drive)

* Digital Media, Architectural and Engineering Design and Precision Machining Majors see the recommendations below:

i5 - i7 Computer
8-16GB of RAM
4-8GB Video Card
500GB-2TB of Hard Drive space
Backup solution (Portable Hard Drive or USB Drive)
